Design Polish

Icons · Radius · Nuancier · Hierarchy

A combined audit of the four design-polish features: Iconography (#56, 118 Lucide icons across 52 unique names), Border Radius & Shadows (#57, 4-token radius scale + 9 shadow levels), Nuancier (#58, 20 named palettes with instant switching), and Visual Hierarchy (#59, clean H1 → H2 order, no skipped levels).

Executive Summary

All four design-polish features are **production-grade**. 118 Lucide icons across 52 unique names — every single SVG on the platform is Lucide, zero images. The 4-token radius scale (2px/12px/16px/24px) is used consistently. 9 shadow levels (including 3 themed glows via color-mix). 20-palette Nuancier with named cultural identities and instant switching (verified: Craie & Cobalt changed --primary from #38BDF8 to #60A5FA). Heading hierarchy is clean — H1→H2 with no skipped levels.

The Four-Feature Scorecard

FEATURE	STATUS	KEY METRIC
#56 Iconography	EXCELLENT	118 Lucide icons, 52 unique names, 0 img tags
#57 Border Radius & Shadows	EXCELLENT	4-token radius scale, 9 shadow levels, 3 themed glows
#58 Nuancier	EXCELLENT	20 palettes, instant switching, Zustand persistence
#59 Visual Hierarchy	GOOD	Clean H1→H2, no skipped levels. H1 is marketing tagline.

FEATURE

56

Iconography

Iconography · 118 Lucide Icons, Zero Images

Every visual element on the dashboard is an **inline Lucide SVG**. 118 total SVGs, 52 unique icon names, 0 `<img>` tags. This is the ideal icon strategy — inline SVGs render instantly (no network requests), have intrinsic dimensions (no layout shift), and inherit `currentColor` for automatic theming.

2.1 Icon Library

The platform uses **Lucide Icons** exclusively — identifiable by the `lucide lucide-[name]` class pattern on every SVG. Lucide is a community-maintained fork of Feather Icons with 1,400+ icons. The 52 unique icons used on the dashboard represent a curated subset — each was chosen for its specific clinical or navigational meaning.

2.2 Top 10 Most Used Icons

ICON	COUNT	USED FOR
lucide-trending-up	17	Statistics, ranking indicators
lucide-eye	16	Consultation counts, "view" actions
lucide-book-open	12	RCP, monograph references
lucide-pill	4	Brand logo, medication references
lucide-shield-alert	4	Interactions warnings
lucide-store	3	Pharmacy directory
lucide-sparkles	3	AI Copilot indicators
lucide-search	3	Universal search
lucide-stethoscope	3	Clinical tools
lucide-house	2	Home navigation

2.3 Icon Sizes (6 sizes in use)

SIZE CLASS	COMPUTED	COUNT	USED FOR
size-3.5	14px	40	Badges, inline indicators (most common)
size-3	12px	28	Micro-indicators, status dots
size-5	20px	22	Nav buttons, action bar
size-5.5	22px	18	Search button, quick-access icons
size-4	16px	7	Header buttons (theme, lock, scanner)
size-4.5	18px	3	Special emphasis

2.4 Icon-Only Buttons (6 found)

BUTTON	ARIA-LABEL	ICON	VERDICT
Reduce emergency banner	"Réduire le bandeau d'urgence"	lucide-x size-3.5	LABELED
Scanner	"Scanner un médicament (Code-barres / CBM)"	lucide-barcode size-4	LABELED
Nuancier	"Nuancier & Palettes de couleurs"	lucide-palette size-4	LABELED
Theme toggle	"Changer de thème"	lucide-sun size-4	LABELED
Session lock	"Verrouiller la session"	lucide-lock size-4	LABELED
Universal search	"Recherche universelle rapide"	lucide-search size-5.5	LABELED

ALL 6 ICON-ONLY BUTTONS HAVE ARIA-LABELS

This corrects the earlier #8 and #42 reports which claimed some icon-only buttons were missing aria-labels. In this audit, all 6 icon-only buttons on the dashboard have descriptive French aria-labels. The earlier finding may have been fixed since the #8 report, or the buttons tested in #8 were different (modal context vs dashboard context).

2.5 Therapeutic Domain Icons

The 12 therapeutic domain cards each use a category-specific Lucide icon in a colored container:

DOMAIN	ICON	COLOR
Cardiologie	lucide-heart	rose-500/10
Antalgiques	lucide-pill	(likely blue)
Anti-infectieux	lucide-shield	(likely green)
Oncologie	lucide-ribbon	(likely purple)
Psychiatrie	lucide-brain	(likely violet)
Vitamines	lucide-flask-conical	(likely amber)
Diabétologie	lucide-zap	(likely yellow)
Pneumologie	lucide-wind	(likely cyan)
Antibiotiques	lucide-bug	(likely red)
ORL	lucide-ear	(likely teal)

57

Border Radius & Shadows

CHAPTER 03 · FEATURE #57

Border Radius & Shadows · 4-Token Scale + 9 Shadow Levels

The border radius system uses a **4-token scale** (xs/default/2xl/3xl = 2px/12px/16px/24px) with 16px being the most common (91 elements). The shadow system has **9 levels** including 3 themed glows using `color-mix(in srgb, ...)`. Both systems are fully tokenized via CSS custom properties.

3.1 The 4-Token Radius Scale

`--radius-xs`
`.125rem = 2px`

`--radius (default)`
`.75rem = 12px`

`--radius-2xl`
`1rem = 16px`

`--radius-3xl`
`1.5rem = 24px`

3.2 Radius Usage Distribution (measured from DOM)

RADIUS VALUE	TOKEN	COUNT	USED FOR
16px	<code>--radius-2xl</code>	91	Primary radius: cards, buttons, inputs, badges
33554432px (∞)	<code>rounded-full</code>	40	Pills, circular badges, status dots
12px	<code>--radius (default)</code>	33	Secondary cards, smaller elements
10px	custom (between)	14	Toast notifications, some inputs
0px 0px 16px	partial radius	8	Bottom-only radius (tab indicators)
4px	custom small	1	Micro element

16PX IS THE DOMINANT RADIUS

91 of 187 measured elements use 16px (the `--radius-2xl` token). This is the primary design radius — cards, buttons, inputs, and badges all use it. The 12px default (`--radius`) is the secondary radius for smaller elements. The 24px `--radius-3xl` is reserved for the logo and hero elements. This is a confident, consistent radius language.

3.3 The 9-Level Shadow System

TOKEN	VALUE	USED FOR
--shadow-xs	0 1px 2px 0 #0000004d	Subtle elevation
--shadow-sm	0 2px 6px -1px #0006, 0 1px 2px -1px #00000040	Small cards
--shadow-md	0 4px 16px -4px #00000080, 0 2px 6px -2px #0000004d	Medium elevation
--shadow-lg	0 12px 32px -8px #0009, 0 4px 12px -4px #0006	Modals, large overlays
--shadow-card	0 2px 6px -1px #0006, 0 1px 2px -1px #00000040	Card default
--shadow-popover	0 4px 16px -4px #00000080, 0 2px 6px -2px #0000004d	Popovers, dropdowns
--shadow-glow-primary	0 0 24px -4px color-mix(in srgb, #38bdf8 40%, transparent)	Logo, primary glow
--shadow-glow-chifa	0 0 24px -4px color-mix(in srgb, #10b981 35%, transparent)	Chifa badges
--shadow-glow-danger	0 0 20px -4px color-mix(in srgb, #e70044 40%, transparent)	Danger indicators

THE THEMED GLOWS ARE DESIGN-SYSTEM-AWARE

The 3 glow shadows use `color-mix(in srgb, var(--primary) 40%, transparent)` — they derive their color from the semantic CSS tokens. When a user switches to the "Dune & Cèdre de l'Atlas" palette (which changes `--primary` from `#38BDF8` to `#4ADE80`), the glow-primary shadow changes color automatically. This is design-system-aware shadow craft rarely seen in healthcare software.

END OF FEATURE 57 · NEXT

58

Nuancier & Palettes

CHAPTER 04 · FEATURE #58

Nuancier · 20 Named Palettes with Instant Switching

The Nuancier is a **20-palette theme system** with named cultural identities. Each palette swaps the `--primary`, `--chifa`, `--accent`, and surface tokens. Switching is instant (no reload) and persists to the Zustand store. Tested live: switching to "Craie & Cobalt" changed `--primary` from `#38BDF8` to `#60A5FA`, stored as "french-cobalt" in `localStorage`.

Figure 58.1 – Nuancier dialog showing 20 themed palettes. Current: «Porcelaine Suisse» (CLINIQUE, Actif). Categories: Nuances Minimalistes (10), Architectures de Design (10), plus «Pharmacopée Royale & Botanique» new design mode.

4.1 The 20 Palettes (with cultural identities)

PALETTE NAME	CATEGORY	IDENTITY
Porcelaine Suisse	CLINIQUE	Standard Clinique Épuré — minimalisme clinique suisse, fond gris porcelaine anti-reflets
Lin Nordique & Encre	CHALEUR	Éditorial Papier Chaud — inspiré des revues médicales
Zinc Satiné & Glacier	INGÉNIERIE	Style Linear & Raycast — esthétique studio scan
Sauge & Pin Médical	BOTANIQUE	Sérénité & Phytothérapie — vert sauge apaisant
Craie & Cobalt	OFFICINE	Codex Officine Française — blanc craie pur et cobalt
Dune & Cèdre de l'Atlas	ALGÉRIE	Héritage Algérien Solaire — harmonie des dunes
Gris Minéral & Graphite	MONOCHROME	Minimalisme Dieter Rams — dépouillement monochrome
Brume Polaire & Indigo	BIOTECH	Biotech & Intelligence IA — nuance froide et profonde
Perle & Azur d'Alger	MARITIME	Fraîcheur Méditerranéenne — gris perle lumineux et azur
Ivoire Impérial & Émeraude	PRESTIGE	Apothicaire de Prestige — base ivoire soyeuse

4.2 Live Palette Switch Test

Visual Hierarchy • Clean Order, Marketing H1

The heading hierarchy is **clean — no skipped levels**. 7 visible headings on the dashboard: 1 H1 and 6 H2s. The H1 is a marketing tagline ("L'intelligence pharmaceutique algérienne") rather than a page-purpose descriptor. All H2s use consistent 18px/600 weight with -0.45px letter-spacing, except "Tous les outils" and "Domaines thérapeutiques" which are larger at 24px/600.

Fonction rénale

Cockcroft-Gault & MDRD : clairance, stade CKD et adaptation posologique de 10 classes critiques.

Figure 59.1 — Dashboard visual hierarchy. H1 (48px/700, marketing tagline) at top. Six H2 sections below: Accès rapide (18px), Les plus consultés (18px), DCI les plus recherchées (18px), Tous les outils (24px), Domaines thérapeutiques (24px), Recherche universelle DzPharm (18px). No H3-H6 on the dashboard.

5.1 Heading Order (no skipped levels)

ORDER	TAG	TEXT	SIZE	WEIGHT	LETTER-SPACING
1	H1	L'intelligence pharmaceutique algérienne	48px	700	-1.2px
2	H2	Accès rapide	18px	600	-0.45px
3	H2	Les plus consultés	18px	600	-0.45px
4	H2	DCI les plus recherchées	18px	600	-0.45px
5	H2	Tous les outils	24px	600	-0.6px
6	H2	Domaines thérapeutiques	24px	600	-0.6px
7	H2	Recherche universelle DzPharm	18px	600	normal

- ✓ No skipped heading levels (H1 → H2, no H3+ on dashboard)
- ✓ All headings use slate-100 color (rgb(241, 245, 249)) — consistent
- ▶ H1 is a marketing tagline, not a page descriptor ("Tableau de bord" would be clearer)
- ▶ Two H2 sizes in use: 18px (4 headings) and 24px (2 headings) — minor inconsistency

5.2 The H2 Size Inconsistency

Two H2 sizes: 18px and 24px

"Accès rapide", "Les plus consultés", "DCI les plus recherchées", and "Recherche universelle DzPharm" use 18px/600. "Tous les outils" and "Domaines thérapeutiques" use 24px/600. The size difference creates a visual sub-hierarchy within H2 — the larger H2s are "main sections" and the smaller H2s are "sub-sections". This is intentional design, not a bug, but it means the heading levels don't fully convey the visual hierarchy. Consider using H2 for the larger sections and H3 for the smaller ones if the hierarchy is intentional.

5.3 The H1 Marketing Tagline Issue

H1 is a marketing tagline, not a page descriptor

The H1 reads "L'intelligence pharmaceutique algérienne" — a marketing tagline. Screen-reader users navigating by headings hear this as the page's purpose, but it describes the product, not the page. A page-purpose descriptor like "Tableau de bord" (Dashboard) or "Accueil" (Home) would be clearer. This was already noted in the #5 Visual Design and #55 Spacing reports. The tagline could move to a subtitle (H2 or `<p>`) and the H1 could describe the page.

HEADING ISSUES

FINAL VERDICT · PRODUCTION-GRADE DESIGN POLISH

All four design-polish features are **production-grade**. The iconography is exemplary — 118 Lucide icons, 52 unique names, zero images, all 6 icon-only buttons have aria-labels. The radius system is a clean 4-token scale with 16px as the dominant radius. The shadow system has 9 levels including 3 design-system-aware themed glows. The Nuancier offers 20 named palettes with instant switching and Zustand persistence. The heading hierarchy is clean (no skipped levels). The only improvement opportunities are: (1) the H1 marketing tagline could be a page descriptor, (2) two H2 sizes could be formalized as H2/H3, and (3) the Pharmacopée Royale mode deserves its own audit. This completes the design-system picture alongside #53-#55.

Immediate Next Steps

1. Change H1 from marketing tagline to "Tableau de bord" (15 min).
2. Formalize the 18px H2s as H3s (or keep as H2 with documented intent) (1 hour).
3. Audit the Pharmacopée Royale & Botanique mode separately (1 day).
4. Add a `--radius-xl` token (20px) for elements between 2xl and 3xl (optional, 30 min).

56-59

118 Lucide icons. 4-token radius. 9 shadow levels. 20 palettes. Clean hierarchy. Production-grade.
