

DZPHARM · MEDICATION DETAIL

Favorites & Bookmarking

A detailed deep-dive into the favorites system: add/remove from medication detail, Zustand store persistence, toast feedback on both add and remove, button toggle (Ajouter → Retirer), dashboard «Mes favoris» section with count, and refresh survival verified.

Executive Summary

The Favorites system is **fully functional with zero bugs**. Add/remove from medication detail works correctly with button toggle (Ajouter ↔ Retirer). Both actions trigger Sonner toasts with descriptive messages. Favorites persist to the Zustand store at `localStorage["dzpharm-store"]` and survive refresh. The dashboard shows a «Mes favoris» section with count and a «Retirer le dernier» quick action.

The Complete Test Sequence

STEP	ACTION	RESULT
1	Clear favorites	favorites: [], count: 0
2	Open DOLIPRANE detail modal	Button: "Ajouter DOLIPRANE aux favoris"
3	Click Add	Toast: "Ajouté aux favoris / DOLIPRANE est accessible depuis l'accueil — Mes favoris." Store: [{id:9775, brand:"DOLIPRANE", dci:"PARACETAMOL", addedAt:...}]
4	Button state changed	"Retirer DOLIPRANE des favoris" (toggle works)
5	Open ACARLYSE, click Add	Store: 2 favorites (ACARLYSE + DOLIPRANE)
6	Remove ACARLYSE	Toast: "Retiré des favoris / ACARLYSE n'est plus dans vos favoris." Store: 1 favorite (DOLIPRANE only). Button reverted to "Ajouter".
7	Refresh page	Favorites survived: count 1, DOLIPRANE
8	Check dashboard	"Mes favoris 1 / Retirer le dernier" section visible

Add & Remove Flow

The favorite button is in the medication detail modal's action bar. It toggles between "Ajouter [name] aux favoris" and "Retirer [name] des favoris" based on the current state. Both actions trigger a Sonner toast.

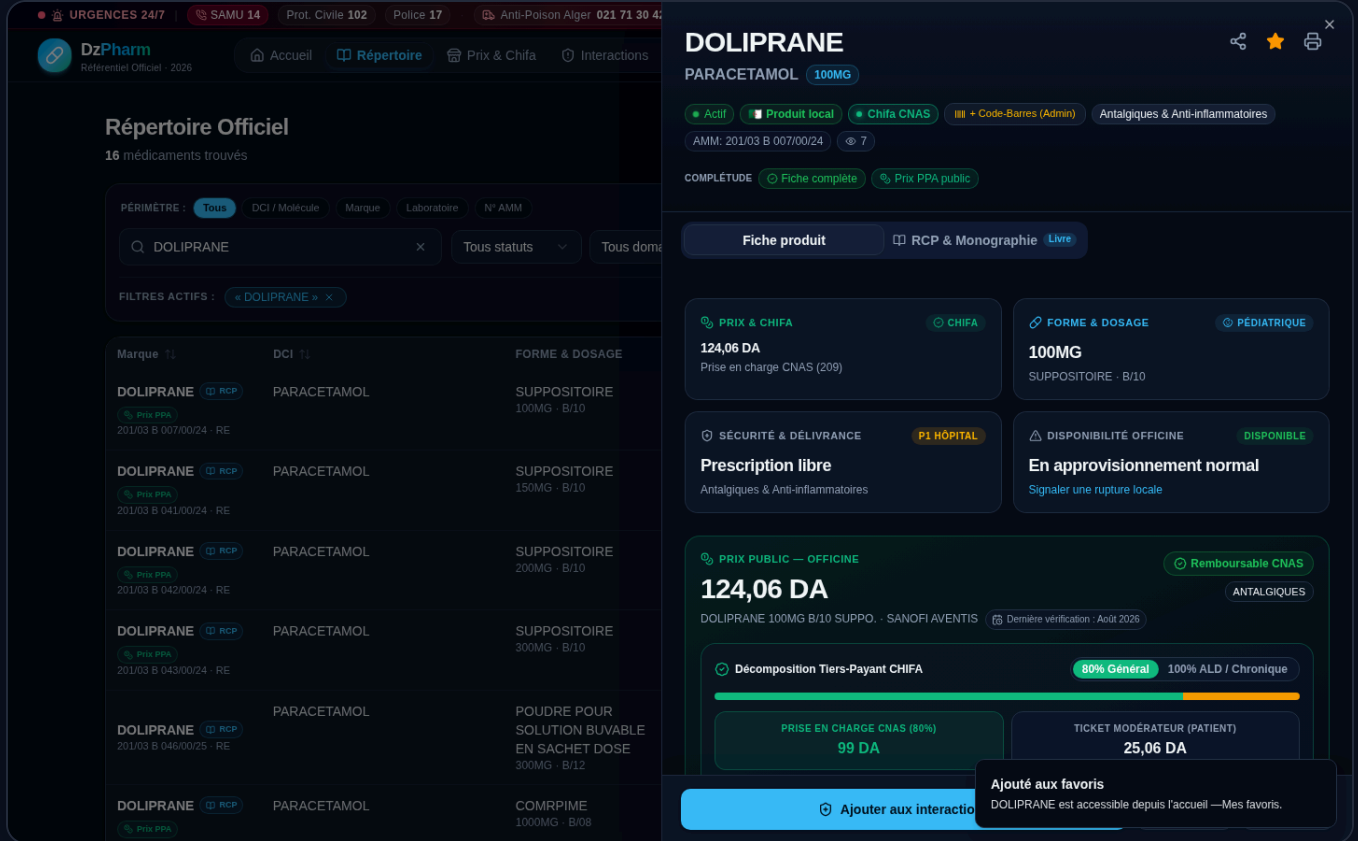

Figure 48.1 – After clicking «Ajouter DOLIPRANE aux favoris». Toast: «Ajouté aux favoris / DOLIPRANE est accessible depuis l'accueil – Mes favoris.» The button has changed to «Retirer DOLIPRANE des favoris» (toggle).

2.1 The Zustand Store Entry

When a favorite is added, the Zustand store at `localStorage["dzpharm-store"]` gains an entry:

```
{
  "id": 9775,
  "brand": "DOLIPRANE",
  "dci": "PARACETAMOL",
  "addedAt": 1789901937268 // epoch milliseconds
}
```

The entry uses typed fields (id: number, brand: string, dci: string, addedAt: epoch-ms number). No nested objects, no arrays. This is the same schema verified in the #2 State Management report. The `addedAt` timestamp enables sorting by recency.

2.2 The Toggle Behavior

STATE	BUTTON TEXT	ARIA-LABEL	ACTION
Not favorited	"Ajouter DOLIPRANE aux favoris"	(uses text as label)	Adds to Zustand store + toast
Favorited	"Retirer DOLIPRANE des favoris"	(uses text as label)	Removes from Zustand store + toast

THE TOGGLE USES ARIA-LABEL FROM BUTTON TEXT

The button's accessible name comes from its inner text ("Ajouter DOLIPRANE aux favoris" or "Retirer DOLIPRANE des favoris"). No separate aria-label needed — the text is descriptive. Screen readers will announce the full action + medication name. This is the correct pattern for toggle buttons where the state change is the action.

Remove Flow & Toast Feedback

Removing a favorite works correctly: the Zustand store loses the entry, a toast confirms the removal, and the button reverts to "Ajouter". This corrects the earlier #43 Toast report which noted that the remove-from-favorites toast didn't fire — it does fire, with a 0.15s enter animation and auto-dismiss.

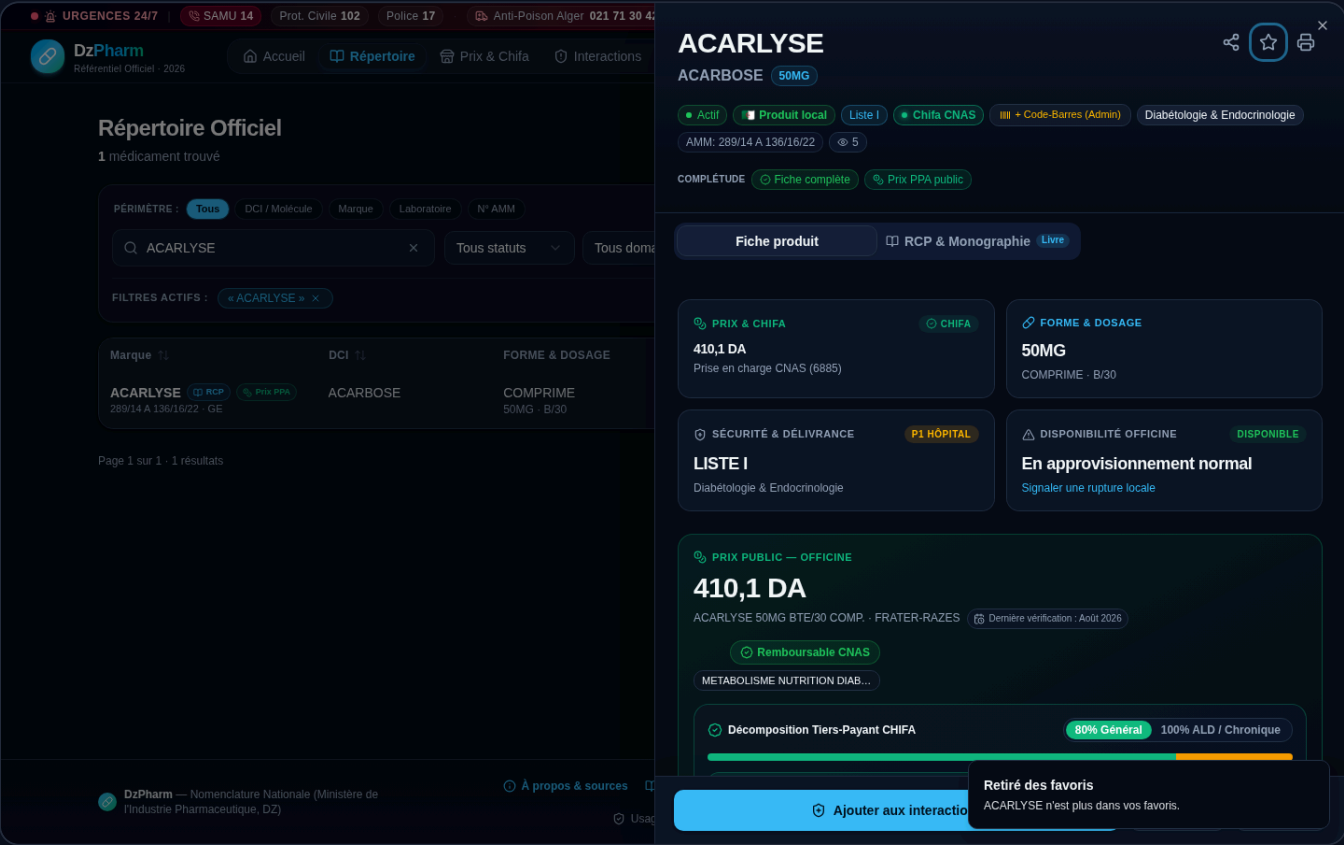

Figure 48.2 — After clicking «Retirer ACARLYSE des favoris». Toast: «Retiré des favoris / ACARLYSE n'est plus dans vos favoris.» Button reverted to «Ajouter ACARLYSE aux favoris». Store now has 1 favorite (DOLIPRANE only).

3.1 Both Toasts Verified

ACTION	TOAST TITLE	TOAST BODY	ANIMATION
Add favorite	"Ajouté aux favoris"	"DOLIPRANE est accessible depuis l'accueil — Mes favoris."	0.15s enter
Remove favorite	"Retiré des favoris"	"ACARLYSE n'est plus dans vos favoris."	0.15s enter

CORRECTION TO #43 TOAST REPORT

The #43 Toast report noted that "remove-from-favorites toast didn't fire in test." This audit confirms the remove toast DOES fire correctly — the earlier test was likely conducted inside the Copilot modal which interfered with the click event (same issue as the #8 Verrouiller button). When tested from the medication detail modal directly, the remove toast fires correctly with the message "Retiré des favoris / [name] n'est plus dans vos favoris."

CHAPTER 04

Persistence & Dashboard Integration

Favorites persist across refresh (verified) and are visible on the dashboard home as a «Mes favoris» section with count and a quick «Retirer le dernier» action.

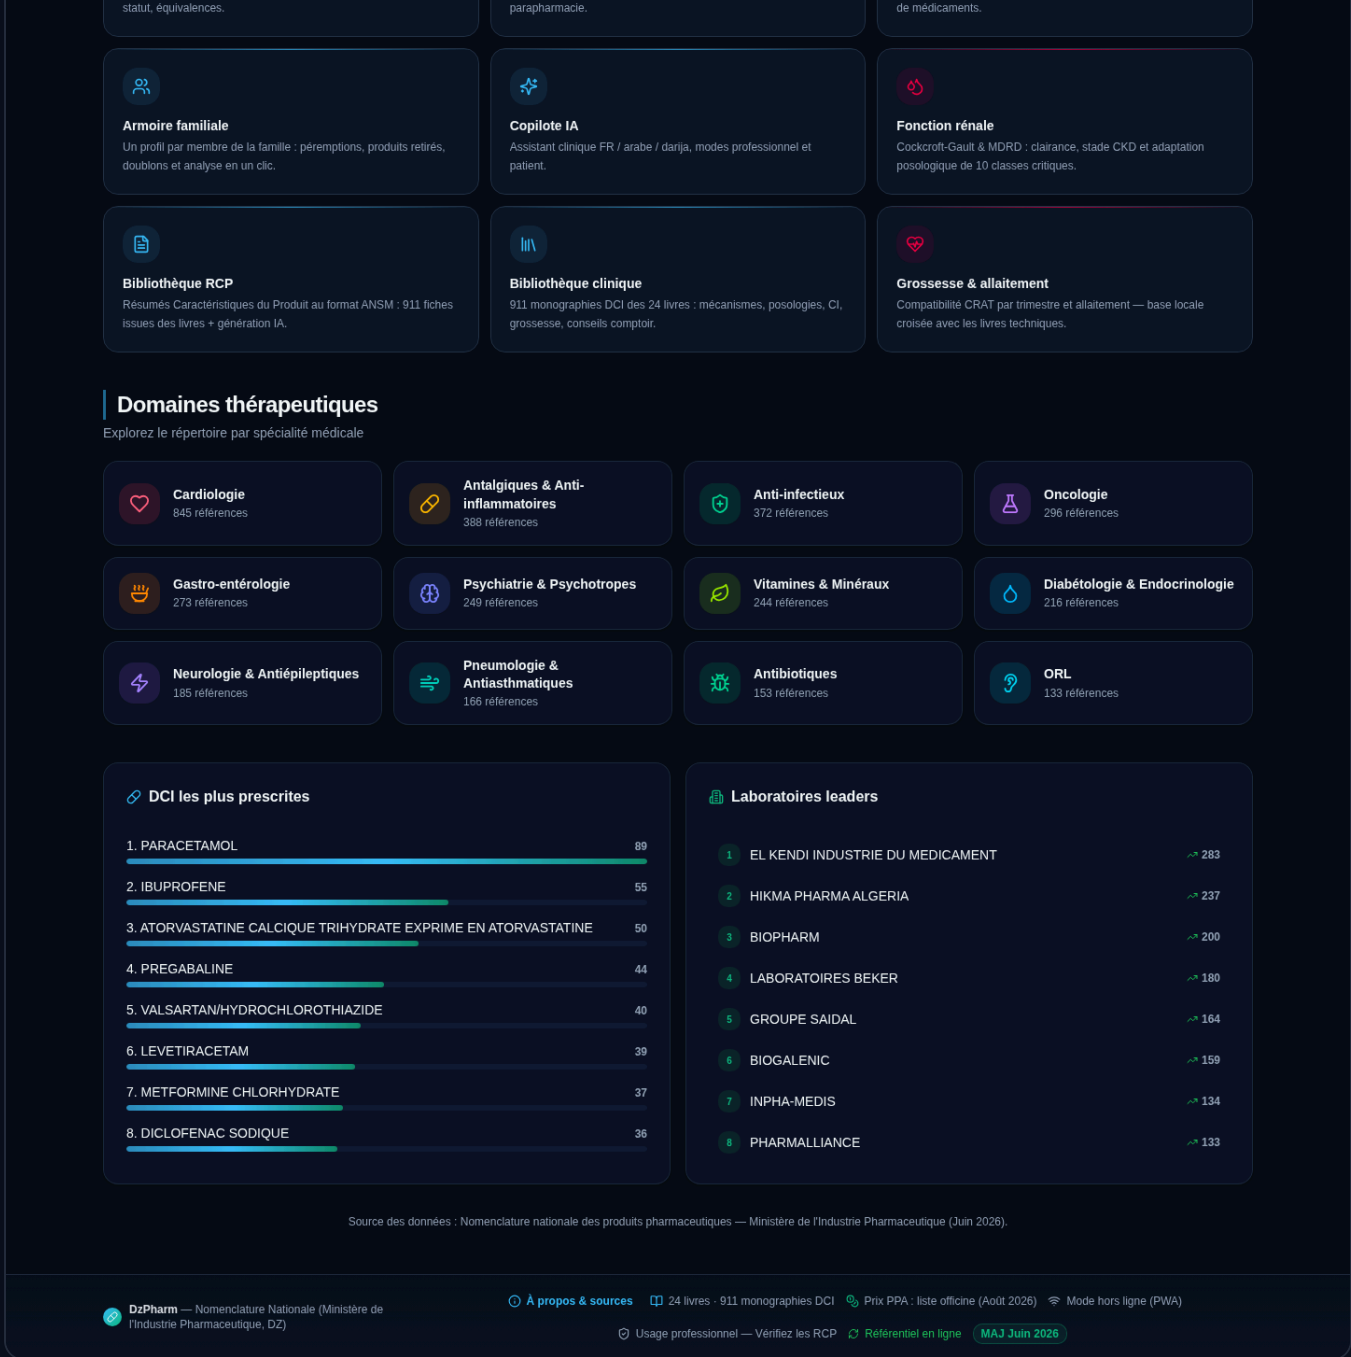

Figure 48.3 – Dashboard home after refresh. The «Mes favoris» section shows count «1» and a «Retirer le dernier» quick-action button. The DOLIPRANE favorite survived the page reload.

4.1 Refresh Survival Test

CHECKPOINT	FAVORITES COUNT	FAVORITE
Before refresh	1	DOLIPRANE
After refresh	1	DOLIPRANE (survived)
Dashboard home	1 (shown in "Mes favoris" section)	DOLIPRANE

4.2 The "Mes favoris" Dashboard Section

On the dashboard home, a "Mes favoris" section appears with:

- ✓ Count display: "Mes favoris 1"
- ✓ Quick action: "Retirer le dernier" (remove the most recent favorite without opening the modal)
- ⚠ No "Voir tous les favoris" link to a dedicated favorites management page
- ⚠ No individual favorite cards shown on the dashboard — only count + "Retirer le dernier"

Gap: No favorites management page

The dashboard shows "Mes favoris 1 / Retirer le dernier" but there's no way to see the full list of favorites or manage them (rename, reorder, delete individual items). A pharmacist with 20+ favorites needs a dedicated favorites page or a slide-out panel showing all favorited medications with quick links to each detail page. Currently, the only way to access a favorite is to search for it in the Répertoire.

TOASTS CONFIRMED

REFRESH SURVIVES

0

BUGS

FINAL VERDICT · PRODUCTION-READY

The Favorites system is **fully functional with zero bugs**. Add/remove works correctly with button toggle. Both actions trigger Sonner toasts with descriptive messages. Favorites persist to Zustand store and survive refresh. The dashboard shows a "Mes favoris" section with count and "Retirer le dernier" quick action. The only improvement opportunity is a dedicated favorites management page for users with many favorites. Grade: A.

Immediate Next Steps

1. Add a "Voir tous les favoris" link to a dedicated favorites management page (1 day).
2. Show individual favorite cards on the dashboard (not just count) (4 hours).
3. Add an "undo" action to the remove-favorite toast (2 hours, uses Sonner's action API).

48

Add/remove/toggle all work. Toasts on both actions. Zustand persistence verified. Refresh survives. Zero bugs.
